Naim Miftari: I could do 500 times worse than Nazim Bllaca

From **Zëri i Kosovës** – 2 February 2012

Naim Miftari has decided to speak. He claims to have a lot of information, even about spying by the people close to the KLA, against Adem Jashari, Zahir Pajaziti and others.

The man who claims to have been an investigator for SHIK has said to have reliable information as to how the Serbian Secret Service knew a lot about the KLA war, part of which was also himself, written in the daily “Koha Ditore”, broadcasted by Telegraph.

He says he reported regularly to Kadri Veseli, from whom he says to have received concrete assignments.

Miftari says that during his work he did see Nazim Bllaca’s code – “Seiko”, whereas about himself he says his code was “031”.

Miftari, who has now given a statement to the Prosecution, says he has got proof as well. He said he hadn’t handed over hundreds of files to SHIK but has kept them himself.

Amongst those, five CD-s given to him by Ibush Kllokoqi. He has stated that during the years after the war he has had proposals from high officials at the PDK to commit murders for money, but he refused. He sends them a message “do not make me snap because I could do 500 times worse than Nazim Bllaca”.
